

Bausch Health Announces Health Canada Clearance of Solta Medical's Thermage® FLX System (English)

April 29, 2025

A Long-Awaited Advancement in Non-Invasive Radiofrequency Skin Tightening Is Now Approved for the Canadian Market

LAVAL, Quebec, April 29, 2025 – Bausch Health Companies Inc. (NYSE: BHC)(TSX: BHC), a global, diversified pharmaceutical company, and its aesthetic business, Solta Medical, announced today that Health Canada has granted medical device license clearance for Thermage® FLX, the latest generation of the globally-recognized Thermage® system for non-invasive skin tightening and contouring.

"The clearance of Thermage FLX in Canada is a positive development for our company and important for the continued growth of our aesthetic business", said Thomas J. Appio, Chief Executive Officer, Bausch Health. "As the pioneer in non-invasive skin tightening, Thermage has earned trust worldwide—and we're thrilled to bring the latest generation of this globally recognized technology to Canadian providers and patients who have been waiting for it."

Thermage FLX represents the fourth generation of innovation in monopolar radiofrequency (RF) technology from Solta Medical. With a long legacy of trust among providers and patients, the Thermage platform is a globally established system trusted by providers for more than 20 years. In Canada, providers have eagerly awaited the next evolution of this system, and they will now gain access to the same smart technology already in use by leading aesthetic clinics around the world.

"Thermage FLX was designed with both providers and patients in mind. With enhanced ergonomics, smart impedance feedback, and improved comfort, it delivers the personalized treatment experience patients are seeking and the reliable results providers expect from Thermage," said Jiny Kim, Senior Vice President, Solta Medical, Bausch Health.

Key Features of Thermage FLX:

- **Larger Treatment Tip:** The 4.0 cm² Total Tip 4.0 delivers 25% faster treatments compared to previous generations, increasing efficiency while maintaining consistent results.
- **Enhanced Patient Comfort:** Integrated vibration and cooling improve patient experience during treatment.
- **Smart Impedance Technology:** AccuREP™ technology reads skin impedance and adjusts RF energy output with each pulse, tailoring treatment to each patient's unique skin needs.
- **Ergonomic Design:** A redesigned handpiece improves ease of use for providers, supporting precise delivery and a more comfortable workflow.
- **Versatile Applications:** For the non-invasive treatments of wrinkles and rhytids on the face, eyes, and body—including areas with thinner or more delicate skin.

With the approval of Thermage FLX, Solta Medical continues to build on its legacy of science-backed, non-invasive technologies—and support providers with smart systems that deliver

consistent results across a range of patient needs.
